Objectives and Investment Policy

The **Investment Objective** of the Sub-Fund is to produce stable and consistent returns in the medium to the long term.

The Investment Policy: The Sub-Fund shall invest predominantly in debt securities which may be listed on an Approved Regulated Market and/ or traded over-the-counter. The Sub-Fund shall hold a diversified portfolio of government, corporate and supranational bonds over a broad base of issuers and industries, or in bonds determined to be of comparable quality. The Investment Manager considers the following factors in evaluating debt securities for purchase by the Sub-Fund, including:

- The difference, or "spread", between the yield of the security and the yield of a comparable government security;
- The size of the issuer, the issuer's sensitivity to economic conditions and trends and the issuer's operating history; and
- The issuer's financial resources and financial condition, including leverage and cash flow to cover interest expense and principal repayment.

The Sub-Fund is not expected to have any bias towards any specific

The Sub-Fund may, hedge interest rate, currency and credit risk with a view to stabilize the expected returns of its portfolio and to reduce overall risks through the use of (i) listed and OTC FDIs including bond futures, currency forwards as well as interest rate and credit default swaps, and (ii) ETFs. The above risk and reward indicator rates this Sub-Fund as category 3 meaning that it offers a moderate risk of making a loss but also a moderate chance of making substantial gains. Even the lowest category on the indicator does not mean risk free. The Sub-Fund's rating reflects the nature of its investments and the corresponding risks to which it is exposed that is based on simulated data and therefore not a reliable indication of the future risk profile of the Sub-Fund. The risk and reward profile of the Sub-Fund is not guaranteed to remain unchanged and may shift over time. These risk factors, which include below, may affect the value of the Sub-Fund's investments / expose the Sub-Fund to losses:

Exchange Rate Risk – The Sub-Fund may invest in assets denominated in currencies other than EUR, thereby exposing the Sub-Fund to fluctuations in exchange rates.

Use of FDIs – It is anticipated that the Sub-Fund will hold FDIs for the purpose of hedging interest rate, currency and credit risk. FDIs also involve risks which are different from, and in certain cases, greater than, the risk presented by more traditional investments.

Credit Risk – money market instruments, bonds or other debt instruments held for a fund involve credit risk represented by the possibility of default by the issuer. Debt instruments which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated and/or unsubordinated securities.

Operational Risk – If a custodian or sub-custodian appointed by or on behalf of the Sub-Fund were to become insolvent, or act negligently or fraudulently this could lead to the substantial loss of securities held in custody for the Sub-Fund.
